This week, the region saw significant increases in the number of new cases and new patient hospital admissions.

The total number of **new cases this week** rose to 989, representing an increase of 253 (25%) over previous weeks.

The greatest rise in cases were in Jackson (22%), Johnson (27%) and Wyandotte (30%) counties and KCMO (30%).

The number of patients admitted to hospitals with COVID-19 rose to 188; nearly 6 times previous weeks.

The greatest increase in COVID-19 hospital admissions was in Wyandotte County with over 100 admissions.

People requiring hospitalization represent those with either severe or critical symptoms; deaths occur most frequently among those with critical symptoms. This is a reflection of the severity of COVID-19 cases in the region.

The positivity rate (the number of tests returned positive), remains close to 6%, which is in the acceptable range for the number of tests conducted, although Wyandotte County reported a nearly 30% positivity rate earlier in the week, which is unusually high.

### What you can do
- Wear a face mask in public
- Practice social distancing
- Wash hands often
- Stay at home if you are sick
- Frequently clean high-touch surfaces
- Donate supplies
- Volunteer your time

### Key data points
- **New cases**: 989
- **New hospitalizations**: 188
- **New tests**: 15,949
- **New deaths**: 20
